Pacific Rim Real Estate Society Annual Conference
Adelaide, South Australia, Australia
11th - 14th January 2026

PHD COLLOQUIUM

The colloquium is held face-to-face during the upcoming Pacific Rim Real Estate Society 32nd Annual Conference on Sunday 11th January 2026 in Adelaide, South Australia, Australia

We would welcome PRRES Inc members encouraging their PhD students to register for the event which provides the opportunity for PhD students in Property related research, to present their PhD work-in-progress within a supportive environment.

PRRES is offering scholarships valued up to AUD$1,500 available to full time PhD students at a University in the broad PRRES Inc catchment area (Pacific Rim area), and at least one of the supervisors must be a current financial PRRES Inc member. In addition, there are awards for PRRES Inc Early Researcher PhD Prize, and best PhD Presenter at the colloquium.
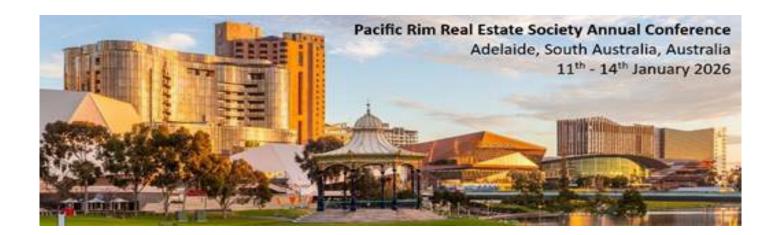

To present at the colloquium, students are required to submit a 3 page research summary with a 150 word abstract to Dr Wejen Reddy wejendra.reddy@rmit.edu.au by the advertised due date and to register for the 2026 PRRES Conference by 31st October 2025. The acceptance will be notified before 15th October 2025. The registration fee for PhD students, is the same as the early bird conference rate registration.

The guidelines will be emailed to members, and information will be forthcoming on the PRRES Inc website.

11th - 14th January 2026

SCHEDULED PANEL SESSIONS AND PRESENTERS

PRRES CONFERENCE: 2026 PANEL SESSIONS AND SPEAKERS
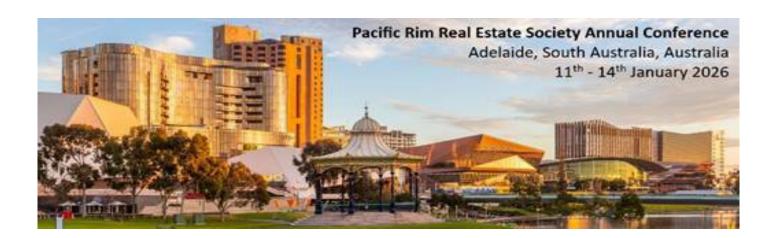

AI Presentation and Workshop

This workshop will explore the transformative potential of AI for industry professionals, academics, researchers in the property sector. Participants will be introduced to practical applications of generative AI for productivity, industry data analysis, research workflows, and teaching innovation. The session will feature live demonstrations of leading AI platforms, alongside practical guidance on effective prompt engineering and integration strategies. Key considerations around ethical and responsible AI use and data privacy will be discussed to support sustainable adoption within universities and professional organisations. The workshop will also reflect on the future of work in an AI-driven world, highlighting emerging trends, sector-specific disruptions, and the skills required for researchers, educators, and practitioners to thrive in this rapidly evolving environment.

Facilitator: Dr Biyanka Ekanayake,
Dr Biyanka Ekanayake is an academic and researcher at University of Technology Sydney (UTS), specialising in artificial intelligence (AI) applications in computer vision and large language models. She holds a PhD in AI with a focus on computer vision for construction project management. Her research explores multimodal AI, particularly vision–language models, to transform the construction and property industries. At UTS, Biyanka leads the PropTech sub-major, Australia's only program dedicated to this emerging field. She also serves as AI Lead for the School of Built Environment, where she drives the ethical and innovative integration of AI into teaching and learning practices. With a professional background in facilities management and expertise in programming, she is currently investigating how generative AI and computer vision can revolutionise the construction and property sectors. Biyanka is a regular speaker at academic forums and industry events, contributing thought leadership on the future of AI in construction and property sectors.
